# HUGE STONE HERE FOR

Monster Block Weighs 109,000 Pounds, or About Fifty-Four and a Half Tons.

Being Hauled Through Streets on Freight Car-Will Be Carved to Represent Sphinx.

What is claimed to be the largest block of stone ever brought to Washington, and probably the largest ever quarried in this country, is on its way through the streets of the city today. It comes from Bedford, Ind., and is destined, when cut, to form one of the two great sphinxes which will guard the entrance to the Scottish Rite Temple at S street and the Avenue

of the Presidents. The "sphinx stone," as it is called, is solid piece of Indiana limestone roughly suggesting the shape of the fabulous monster which had the head of a woman, the body of a lion and the folded an, the body of a bird. The great stone measures about sixteen feet by nine, and contains more than 914 cubic feet of material. It weighs 109,000 pounds, about fifty-four and a half tons. Since there was no wagon in Washington capable of was no wagon in Washington capable of beating so gigantic a burden, it is being taken to the Scottish Rite Temple on a frieght car. It is stated that this is the first, time in the history of the city that this method of hauling by freight car through the streets has been used.

The combined weight of the car and its burden is about 144,000 pounds, which two horses draw with ease along the ralls, except on inclines, when four horses are needed.

Four Hours to Cover Block.

The car containing the block is hauled over the two rails on which it rests onto two other rails laid in front of it. These ralls must first have sleepers put under them and then be securely anchored before the great weight can be rolled on. This slow process will be repeated all down Florida avenue to S street and down S street to the temple. It takes between four and five hours to cover a

block.

On account of the wet condition of the streets progress was haited at Florida avenue and North Capitol street yesterday morning, but operations were resumed last night. Crossing the various street car lines constitutes the chief dif-

# Is This the Kind of Bank You Want to Bank With?

The Munsey Trust Company has a capital of \$2,000,000. It started right, with its capital fully paid in before it opened its doors for business. Capital enough to make it as solid as the "Rock of Gibraltar."

—It pays 2% interest on checking accounts.

—It pays 3% interest on ordinary savings accounts.

—It pays 4% interest on special savings accounts.

Interest compounded monthly (twelve times a year) on the 2% accounts and four times a year on the 3% accounts; twice a year on the 4% accounts and interest so figured that the depositor gets a "Square Deal". There are no rules, no penalties, no subterfuges with us that whittle down the rate of interest; and your money draws interest every day it is in The Munsey Trust Company, however long or short the time, and every business day in the year is deposit day.

The Munsey Trust Company is a serious, substantial bank, conducted on sound business lines. Its methods are clean, clearcut and straight-forward. It has no tavorites, it treats all men the same,—treats the big man no better than the little man and treats all alike, with well considered courtesy.

If this is the kind of bank that appeals to you, we should be glad to have you open an account with us. Measured from every angle—the interest we pay, and the way we figure interest, and the strength and substantiality of The Munsey Trust Company—is there any other bank anywhere where you can do as well? Think this over—it is very much worth your while.
